RePVC™ and ReUze™ Get NSF Listing

CHARLOTTE, NC – March 18, 2010 – RePVC and ReUze can now be added to Charlotte Pipe and Foundry Company's list of NSF listed products. Both piping systems were inspired by the Green and Sustainability industries.

ReUze™, a purple CPVC piping system for distributing non-potable water *inside* the building, is directly aimed at increasing water efficiency. Non-potable water can be used to save building owners money, relieve stress on already over burdened public agencies and preserve a precious resource in applications such as cooling tower make up water, toilet and urinal flushing and process water.

RePVC™ is a coextruded PVC pipe that uses 100% recycled content as the center layer. It expands the market for recycled materials, slows the consumption of raw materials and reduces the amount of waste entering landfills. Simply stated, we believe that one day all non-pressure pipe will incorporate recycled content because it is the right thing to do for the environment. RePVC is one of the first products to be certified by NSF to ASTM F 1760.

Getting NSF listed was especially important for Charlotte Pipe. "NSF certification means that your product will be recognized and respected by engineers, code officials, building owners and contractors," said Greg Nahrgang, New Product Development Manager. "Third party conformity assessment is one of the best ways to ensure that a manufactured product complies with the standards."

Charlotte Pipe and Foundry is the only manufacturer that offers a *system* of ABS, PVC, CPVC, cast iron, FlowGuard Gold®, ChemDrain®, ReUze™ and RePVC™ pipe and fittings for residential and commercial plumbing systems and industrial applications. The nation's leading maker of cast iron and plastic pipe and fittings, Charlotte Pipe and Foundry offers the industry's broadest product offering of standard and specialty DWV products.

Charlotte Pipe and Foundry is headquartered in Charlotte, NC, and has seven plant locations across the United States. Combining modern technology with a century of craftsmanship and experience, Charlotte Pipe and Foundry has a proud legacy of commitment to the industry and its customers. The company is guided by the philosophy of its founder - produce the best product possible and provide the best service for the customer.
